

FIRE PREVENTION

Reasons for the fire routine

- 1) To prevent fire
- 2) To ensure that an alarm is raised quickly
- 3) To deal with an evacuation of the premises
- 4) To ensure that the Emergency Services are called to all incidents with the least possible delay.

Prevention of fire

In order to prevent fire, common sense attitudes to fire risk are required.

Common causes of fire are often the misuse of electrical equipment and the lack of adequate precautions when using naked flames.

- A safety check when using electrical appliances and naked flames must be part of an operating routine
- Always turn off gas and electrical appliances after use
- Store aerosols away from naked flames and sunlight
- Keep fire doors closed
 - Please note:
 - The fire doors in the corridors have been fitted with magnetic restraints which release them into the closed position when the alarm is triggered.
 - All fire doors are clearly marked and include some classroom doors
